

Clickbank Autoresponder & Follow Up Integration

© AWeber Communications, Inc. 2006

Following up with customers after they purchase is a critical part of the sales process. This communication helps foster trust and loyalty from people who have already purchased from you.

By redirecting your Clickbank buyers to an opt-in form for your customer list, you can have them add to your AWeber autoresponder account. You can then:

- ▶ Send post purchase email to customers
- ▶ Send out purchased information products automatically
- ▶ Up-sell your customers using email
- ▶ Send customer newsletters, etc

Integrating AWeber with Clickbank - Step By Step

1. Create AWeber opt-in Form For Your Customers

Login to your AWeber account at <http://www.aweber.com/login.htm>

- ▶ Choose the appropriate list from the "Select List" dropdown menu in the upper right-hand corner of the page
- ▶ Click the "Leads" tab, then the "Web Form Generator" link

- ▶ Click "Create New Web Form"

Web Forms:

Turn off any pop-up blockers before using this page. Web Form Generator allows you to create hover pops that are immune to pop-up blockers, traditional pop-ups, exit pop-ups, pop-up under and standard web forms placed within your standard webpage. If you create more than one web form you will be given the opportunity to split test different forms on your site automatically and decide which form is the best to use. **Note:** Statistics are delayed 10 minutes.

[Create new web form.](#)

- ▶ Create your Web Form using the Web Form Generator

[Watch our Web Form Generator video tutorial](#)

- ▶ After you save your form, you'll be taken to the main Web Form Generator page. There, click the "Get HTML" link, and copy the form HTML from the popup that appears

2. Place Web Form on Your Website

You now need to place the form onto a page of your site so that your customers can fill it out after purchase. Typically this will be a page of your site that is not linked to from any other pages, so that only your customers can access it.

If you are unsure how to create that web page, or how to place the form HTML onto it, please refer to your web host or website editing software for assistance.

3. Create Product in Clickbank

You now will create a product in your Clickbank account and tell Clickbank to redirect customers to the web page where you placed the AWeber web form. This way, after they pay you, your customers can sign up to your list.

▶ Login to your account at <http://www.clickbank.com/login.htm>

▶ Click the "Account Settings" tab at the top of the page

▶ Click the "My Products" link just below that tab

On this page is a section labeled "Add a New Product"

▶ In the field labeled "Delivery "Thank-you page" URL", enter the address of your web page where you have placed the AWeber form

A screenshot of the 'Add a New Product' form. The form has a title 'Add a New Product' and two input fields. The first field is labeled 'Delivery "Thank-you page" URL:' and the second is labeled 'Price:'. To the right of the 'Price' field is a 'Submit' button.

▶ Set the price of the product in the next field and click "Submit"

▶ Complete the other Clickbank steps for creating a product (see https://www.clickbank.com/getting_started.html for assistance)

Now, when someone purchases your product through Clickbank, they will be redirected to your customer opt-in form. There, they can submit the email address where they want to receive your updates, customer newsletter or other information!

Need Help?

If you have any questions about this, or anything else about your account, please contact our customer support team. We have real, live people ready to assist you.

Hours:

Monday – Friday, 7AM – 7PM Eastern time

Saturday, 9AM – 5PM Eastern time
